09/2022 – 12/2022 - Created digital design assets under tight deadlines while maintaining quality. Designed UI layouts, icons, and branding materials for client projects. - Supported UX teams with wireframes and user flow improvements.

Education

MSc User Experience Design

Birmingham City University — 2023 – 2024

Relevant Coursework: User Research, Accessibility & Inclusive Design, AR/VR Design, Gamification in UX

BSc Statistics

Loyola College, Chennai — 2017 – 2020

Focus: Statistical analysis, data-driven decision-making

Projects

T&Cs for Elderly Users — UX Research & Accessibility Project

- Conducted contextual research and usability testing with older adults to understand comprehension barriers in legal terms.
- Identified cognitive load issues and redesigned content flow to improve readability and accessibility.
- Delivered simplified, WCAG-aligned design recommendations that increased user understanding and confidence.

Globast — Accessible OTT Platform (Inclusive Design Project)

- Led inclusive user research with users with visual, motor, and cognitive impairments, including interviews and accessibility testing.
- Iteratively designed and tested accessible UI components, achieving a 90% user satisfaction rating.
- Developed an accessibility-focused design framework to guide platform-wide improvements.

Gamification in E-Learning — User Engagement Study

- Designed and tested gamified learning modules using surveys, interviews, and participatory design activities.
- Analysed engagement data using SPSS to measure the motivational impact of game mechanics.
- Improved learner participation by integrating evidence-backed gamification strategies.

Augmented Botany — AR UX Research Project

- Conducted usability studies for an educational AR prototype aimed at enhancing botanical learning.
- Evaluated interface performance using System Usability Scale (SUS), achieving a score of 85/100.
- Recommended interaction and visual design improvements to enhance user orientation and learning efficiency.
